

In need of a 'detectable warning system' that really works?

Do you or your clients face any of these problems?

- Need to fulfill ADA requirements quickly?
- Vehicles over running corners and cracking tiles?
- Manual handling issues?
- Pedestrian refuge excavation a problem?
- Tiles coming unstuck from the surface?
- Screws vibrating up creating a tripping hazard?
- Blister domes popping off?
- Storage and transport an issue?
- Landfill tax?
- Litigation a risk?
- Want to reduce environmental impact?
- Want to use a product with the lowest lifecycle cost?

Product quick and easy to install

Fulfills all ADA requirements

There is a better solution!!

- Product utilizes recycled products
- Lightweight tiles
- Economical to transport
- No manual handling issues
- Logistics and storage kept to a minimum
- No heavy duty plant required
- No land fill fees
- No risk of trip hazard
- Cost effective
- 7 times more durable than concrete
